AACN Essentials of Critical Care Nursing, Second Edition Basic Books

The authoritative, evidence-based coverage you need to safely and competently care for adult, critically ill patients and their families – or prepare for the critical care nursing certification exam

Endorsed by the American Association of Critical-Care Nurses and written by top clinical experts in acute care nursing, this textbook thoroughly covers all the need-to-know details on the care of adult, critically ill patients and their families. Supported by helpful tables and algorithms, the book's practical, building-block organization starts with the basics before proceeding

to more complex concepts, paralleling the blueprint for the critical care nursing CCRN certification examination.

AACN Essentials of Critical Care Nursing is divided into four logical sections, which, taken as a whole, will give you complete understanding of this challenging area of nursing practice:

- The Essentials** – provides fundamental information that new clinicians must understand to provide safe, competent nursing care to all critically ill patients, regardless of their underlying medical diagnosis.
- Pathological Conditions** – covers pathologic conditions and management strategies commonly encountered in all adult critical care units.
- Advanced Concepts in Caring for the Critically Ill Patient** – presents advanced critical care concepts or pathologic conditions that are less common or more specialized than those generally found in adult critical care units.
- Key Reference Information** – includes reference information that you will find helpful in a clinical environment, such as normal laboratory and diagnostic values, algorithms for advanced cardiac life support, and summary tables of critical care drugs and cardiac rhythms

Each chapter begins with Knowledge Competencies that can be used to gauge your progress. This edition is compatible with ECCO (Essentials of Critical Care Orientation), the online program offered by the American Association of Critical-Care Nurses.

Physical assessment is a means of evaluating health status using a combination of clinical examination and history taking. A complete physical assessment should form the basis of all nursing care. *Physical Assessment for*

Nurses is aimed at all advanced nurse practitioners and nurses preparing to become advanced nurse practitioners. It forms the foundation for extending practice. The text explores best practice in history taking and summarises the key clinical skills needed to develop and improve physical examination skills and to competently assess, diagnose, plan and provide care. *Physical Assessment for Nurses* is adapted for nurse practitioners from Turner and Blackwood: *Lecture Notes on Clinical Skills* (Third edition).

Nursing Mnemonics Simon and Schuster Providing a focus on the knowledge and skills needed to become a successful first-line manager, this unique text emphasizes successful client care by addressing the role of nurses in managing quality and the available resources needed. It also discusses each of the essential components of the manager of care role, as well as the basic or core competencies required of staff nurses inherent in the direct care of clients. Thoroughly revised and updated, this 3rd edition reflects the numerous changes related to evolving management concepts - including understanding the health care system, using personal strengths most effectively, and nurturing professional integrity. Content focuses on client care management, rather than staff management, to go beyond basic management concepts and help those whose role will be managing quality client care. Essential theoretical information is covered with an emphasis on practical application. Application Exercises at the end of each chapter challenge readers to apply what they've just learned. A brief clinical situation is followed by questions or commands to describe the solution, based on what was

learned in the chapter. Critical Thinking Scenarios at the end of each chapter give readers a short case study to consider and questions to test their application of knowledge. A competency-based format is applied throughout and is based on a research study that identifies clinical management skills needed by beginning staff nurses. Objectives and Key Concepts at the beginning of each chapter provide readers with a glimpse at important information contained within. Key concepts are also shown in boldface upon first mention in that chapter. Cartoons are provided throughout to keep readers more actively interested in the text content. Terrorism readiness and disaster management content has been added to prepare readers for today's most relevant issues. The chapter on Understanding the Context of Health has been thoroughly revised to offer readers a glimpse into the heart of the business of health care. New content in this chapter includes economic and political ties to seamless health care, nursing informatics, and technology in practice. The latest issues facing staff nursing are covered - including content on staff shortages, mandatory overtime, agency nurses/temps, self-preservation, and continuing education. Revised and updated instructor's resources are now located online for added flexibility.

About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how

you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking

that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!
