Read this million-copy

bestseller for leadership  
insights about top-down  
change to improve  
productivity in your  
business starting with the  
most important person:  
You. When Captain  
Abrashoff took over as  
commander of USS  
Benfold, it was like a  
business that had all the  
latest technology but only  
some of the productivity.  
Knowing that  
responsibility for

improving performance  
rested with him, he  
realized he had to  
improve his own  
leadership skills before he  
could improve his ship.  
Within months, he created  
a crew of confident and  
inspired problem-solvers  
eager to take the initiative  
and responsibility for their  
actions. The slogan on  
board became "It's your  
ship," and Benfold was  
soon recognized far and

wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the

crew's performance. His crew eventually started calling him "Megaphone Mike," since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning

the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought. Bibliografía española "O'Reilly Media, Inc." Une bonne stratégie : gage du succès concurrentiel sur le long terme Dans le monde tumultueux qui est le nôtre, il est essentiel d'identifier et de maîtriser les fondamentaux de la

stratégie qui assurent pérennité, croissance et rentabilité. Ce livre formalise et met à la disposition de tous, le savoir-faire du Boston Consulting Group avec notamment : les principaux concepts nécessaires à la définition d'une stratégie d'entreprise pertinente que ce soient des notions traditionnelles comme la célèbre matrice BCG de Bruce Henderson, les systèmes concurrentiels... ou de concepts plus récents comme le dialogue stratégique, la

bipolarisation ou la déconstruction ; une démarche systématique d'élaboration et d'exécution de la stratégie afin qu'une bonne stratégie ne soit pas détruite par une mauvaise exécution ; de nombreux exemples d'entreprises françaises, européennes, américaines ou asiatiques. Ancré dans la réalité, l'ouvrage tient compte de la concurrence toujours plus intense, de l'accélération du rythme d'innovation, de la mondialisation et de la visibilité réduite alors que

les investissements sont souvent de plus en plus lourds. Dans ce monde de libre concurrence, ce livre apporte une aide précieuse au dirigeant pour allouer ses ressources mieux que ses adversaires et tendre vers une croissance durable. Two renowned investment advisors and authors of the bestseller *The Great Reckoning* bring to light both currents of disaster and the potential for prosperity and renewal in the face of radical changes in human history as we move into the next century. *The Sovereign Individual* details

strategies necessary for adapting financially to the next phase of Western civilization. Few observers of the late twentieth century have their fingers so presciently on the pulse of the global political and economic realignment ushering in the new millennium as do James Dale Davidson and Lord William Rees-Mogg. Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just

weeks before the coup attempt against Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia and other events that have proved to be among the most searing developments of the past few years. In *The Sovereign Individual*, Davidson and Rees-Mogg explore the greatest economic and political transition in centuries -- the shift from an industrial to an information-based society. This transition, which they have termed

"the fourth stage of human society," will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values.

Diagnosing and Changing Organizational Culture provides a framework, a sense-making tool, a set of systematic steps, and a

methodology for helping managers and their organizations carefully analyze and alter their fundamental culture. Authors, Cameron and Quinn focus on the methods and mechanisms that are available to help managers and change agents transform the most fundamental elements of their organizations. The authors also provide instruments to help individuals guide the change process at the most basic level—culture. Diagnosing and Changing

Organizational Culture offers a systematic strategy for internal or external change agents to facilitate foundational change that in turn makes it possible to support and supplement other kinds of change initiatives.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly

developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions,

including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased

access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child

outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Premier du genre en français, cet ouvrage montre comment utiliser le logiciel Excel et son solveur pour résoudre des problèmes d'optimisation complexes dans les domaines les plus divers : gestion de production, ordonnancement, transport, économie et finances, gestion des organisations, aide à la décision, etc. Le livre met l'accent sur la démarche de modélisation, appliquée à la résolution de 55 problèmes concrets regroupés par discipline.

À partir du descriptif de chaque cas, vous apprendrez, pas à pas, à construire un modèle de programmation linéaire, à le traduire dans une feuille de calcul Excel et à le résoudre par l'intermédiaire du solveur, avec l'aide de macros VBA dans certains cas. À qui s'adresse ce livre ? Aux utilisateurs d'Excel confrontés à des problèmes d'optimisation au quotidien. Aux décideurs, industriels, ingénieurs et responsables de services ayant à résoudre en

entreprise des problèmes complexes d'optimisation et d'aide à la décision. Aux développeurs d'applications complètes sous Excel. Aux étudiants et élèves-ingénieurs des disciplines scientifiques et économiques. Aux enseignants de ces disciplines à la recherche d'un ouvrage complet avec études de cas sur la programmation linéaire. **Youth Employment in Sub-Saharan Africa** Editions Micro Application A legendary mountain biking champion offers practical instructions,

accompanied by entertaining anecdotes and reminiscences, on the essential techniques, skills, and tactics of mountain biking, offering tips on safety, developing a training program, equipment, and more. Original. 20,000 first printing.

 Pédagogique pour les étudiants, opérationnel pour les managers, l'ouvrage apporte les clés pour comprendre et mettre en pratique le marketing actuel : communautés et médias sociaux online, bouche-à-

oreille et conversations online, big data, stratégie de co-création, KPI digitaux, e- et m-commerce, e-leader d'opinion, stratégie de marketing viral, earn-paid-own media, référencement naturel et payant, enchères, flash et QR code, beacon, stratégie multi-omni-cross canal, etc. Trois objectifs sont privilégiés et organisés de manière séquentielle : maîtriser l'essentiel du marketing, puis progresser en assimilant les techniques de base, acquérir enfin

une réelle expertise sur les questions clés actuelles du marketing. Pour cela, quatre principes ont été retenus : proposer d'emblée une synthèse des éléments clés, puis approfondir chaque point dans un chapitre distinct ; privilégier la compréhension des comportements du consommateur, en s'appuyant sur les résultats les plus solides des recherches académiques ; donner une vision stratégique du marketing, sans négliger

pour autant les aspects techniques et les applications concrètes ; s'appuyer sur des exemples réels développés dans de nombreux "Focus Manager", traiter les aspects techniques dans des fiches dédiées et proposer un test de connaissance au terme de chaque chapitre.

Entre 1978 et 2000, l'EPFL s'est profondément développée et transformée.  
Accroissement record du

nombre d'étudiants et de doctorants, développement de nouveaux enseignements, installation définitive de l'Ecole à Ecublens, l'histoire de l'EPFL a connu de fantastiques bouleversements, sous l'impulsion de deux présidents : Bernard Vittoz et Jean-Claude Badoux. Quelques chiffres donnent une idée de ce dynamisme: 2000 étudiants en 1978, 5000 en 2000.

A new perspective on Impressionist art that

offers revealing, fresh interpretations of familiar paintings In this handsome book, a leading authority on Impressionist painting offers a new view of this admired and immensely popular art form. John House examines the style and technique, subject matter and imagery, exhibiting and marketing strategies, and social, political, and ideological contexts of Impressionism in light of the perspectives that have been brought to it in the last twenty years. When all of these diverse

approaches are taken into account, he argues, Impressionism can be seen as a movement that challenged both artistic and political authority with its uncompromisingly modern subject matter and its determinedly secular worldview. Moving from the late 1860s to the early 1880s, House analyzes the paintings and career strategies of the leading Impressionist artists, pointing out the ways in which they countered the dominant conventions of the contemporary art world

and evolved their distinctive and immediately recognizable manner of painting. Focusing closely on the technique, composition, and imagery of the paintings themselves and combining this fresh appraisal with recent historical studies of Impressionism, House explores how pictorial style could generate social and political meanings and opens new ways of looking at this luminous art.  
[Chronique de l'EPFL 1978-2000](#)

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim

Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the

good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the

leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The

findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of

competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the

leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?
