The relationship between environmentally sustainable development and company and business law has emerged in recent years as a matter of major concern for many scholars, policy-makers, businesses and nongovernmental organisations. This book offers a conceptual analysis of the principles of sustainable development and environmental integration in the EU legal system. It particularly focuses on Article 11 of the Treaty on the Functioning of the European Union (TFEU), which states that EU activities must integrate environmental protection requirements and emphasise the promotion of sustainable development. The book gives an overview of the role played by the environmental integration principle in EU law, both at the level of European legislation and at the level of Member State practice. Contributors to the volume identify and analyse the main legal issues related to the importance of Article 11 TFEU in various policy areas of EU law affecting European businesses, such as company law, insurance and state aid. In drawing together these strands the book sets out the requirements of environmental integration and examines its impact on the regulation of business in the EU. The book will be of great use and interest to students and researchers of business law, environment law, and EU law.

Recent developments in direct taxes and VAT/GST Taxes – in general – have become the topic of broad legal and policy discussions. VAT and GST are

often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

This textbook provides a comprehensive overview of international corporate reporting which enhances students' understanding of diversity and convergence in the field. The authors discuss the institutional and cultural context in which international corporate reporting has developed over the years as well as the global reach of IFRS Standards from the IASB throughout and beyond the European Union, into interest groups and emerging economies. Other key elements explored throughout the book include assurance through auditing and corporate governance, narrative reporting, strategic and corporate social responsibility, group accounting, current accounting issues and taxation in corporate reports. Indicative research examples show how the methods used in research papers may be understood and applied. Case studies outline short projects based on corporate cases, with related links to material on corporate websites. Helpful and reliable sources of information and data are identified through hyperlinks to accessible websites. End-of-chapter questions encourage discussion of the main issues. Throughout there is a focus on accountability and the information needs of stakeholders. This new edition of a classic text is fully revised and updated in order to remain essential reading for students of international accounting and corporate reporting globally. The book will be an invaluable resource for postgraduate taught programmes and

final-year undergraduate courses in accounting, finance and business studies.

EBOOK VitalSource: Fundamental Accounting Principles

Corporate Financial Accounting John Wiley & Sons

This book examines cooperation between the US and the EU on financial regulatory reform, notably at the outset and the first three years of the global financial crisis. It discusses the development of US-EU cooperation on financial regulation over the last few decades at several levels, including at heads of state level, markets regulator level and at international level, and progresses with a detailed examination of cooperation at the outset of the financial crisis. It looks at the nature of and motivation for intense US-EU cooperation on coordinating a response to the crisis and presents a compelling argument that a defacto alliance was formed, which served to benefit respective US and EU interests domestically and in the international financial system. Providing a new perspective on financial regulatory reform after the last financial crisis and the relationship of regulatory outcomes to international financial governance, this volume will be of use to researchers interested in transatlantic relations, financial regulation, international relations, global governance, and the European Union, as well as professionals and policymakers working in foreign relations, financial markets, or banking policy.

International GAAP® 2019 is a comprehensive guide to interpreting and implementing International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and

providing insights into how complex practical issues should be resolved in the real world of global financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching IFRS. Written by EYs financial reporting professionals from around the world, this three-volume guide to reporting under IFRS provides a global perspective on the application of IFRS. Complex technical accounting issues are explained clearly and IFRS is set in a practical context with numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world. The 2019 edition of International GAAP® has been fully revised and updated in order to:

- Continue to investigate the many implementation issues arising as entities adopt IFRS 9 (Financial Instruments) and IFRS 15 (Revenue from Contracts with Customers).
- Explore the complex implementation issues arising as entities adopt, in 2019, IFRS 16 (Leases).
- Include an updated chapter on the new insurance contracts standard IFRS 17 (Insurance Contracts), which reflects the recent discussions of the IASB's Transition Resource Group on implementation issues raised, proposed narrow-scope amendments to IFRS 17 intended by the IASB, and also explores other matters arising as users prepare for the adoption of this standard.
- Include an amended chapter on the revised Conceptual Framework, which was published in March 2018. The changes to the Conceptual Framework may affect the application of IFRS in situations where no standard applies to a particular transaction or event.
- Address amended standards and new interpretations issued since the

preparation of the 2018 edition. • Explain the many other initiatives that are currently being discussed by the IASB and by the IFRS Interpretations Committee and the potential consequential changes to accounting requirements. • Provide insight on the many issues relating to the practical application of IFRS, based on the extensive experience of the book's authors in dealing with current issues.
