Tunza was developed by the United Nations Environment Programme (UNEP) who acknowledged the need for a book to stimulate environmental action among young people. Through participatory discussions and suggestions, particularly from participants at the Global Youth Forum held in Denmark in March 2002, young people from around the world helped to produce a book that would provide them and their contemporaries with a reference and forum on key environmental issues. The aim being to motivate and guide young people on actions they can take in their local communities to help sustainable development.

Intergenerational Justice in Sustainable Development Treaty Implementation ConferenceSeries

Co-published with the Association for American Colleges and Universities (AAC&U) If we are all becoming global citizens, what then are our civic responsibilities? Colleges and universities across the United States have responded to this question by making the development of global citizens part of their core mission. A key strategy for realizing this goal is study abroad. After all, there may be no better way for students to acquire the knowledge, skills, and attitudes required to become effective change-agents in international contexts. The Handbook of Practice and Research in

Study Abroad is a comprehensive survey of the field. Each chapter eloquently conveys an enthusiasm for study abroad alongside a critical assessment of the most up-to-date research, theory and practice. This contributed volume brings together expert academics, senior administrators, practitioners of study abroad, and policy makers from across the United States, Canada and other part of the world, who meticulously address the following questions: What do we mean by global citizenship and global competence? What are the philosophical, pedagogical and practical challenges facing institutions as they endeavor to create global citizens? How is study abroad and global citizenship compatible with the role of the academy? What are the institutional challenges to study abroad, including those related to ethics, infrastructure, finances, accessibility, and quality control? Which study abroad programs can be called successful? The Handbook of Practice and Research in Study Abroad is an indispensable reference volume for scholars, higher education faculty, study abroad professionals, policy makers, and the academic libraries that serve these audiences. It is also appropriate for a wide range of courses in Higher Education Master's and Ph.D. Programs.

Written largely by Canadian scholars for Canadian readers, this overview of contemporary human rights concerns introduces the human rights instruments—provincial, national, and international—which protect Canadians. The volume begins with an outline of the history of human rights before moving on to discuss such important topics as the relationship between political institutions and rights protection, rights issues pertaining to specific communities, and cross-cutting rights issues that affect most or all citizens. Contemporary and comprehensive, *Human Rights: Current Issues and Controversies* is a valuable resource for anyone interested in learning more about human rights.

The study of children's illustrated books is located within the broad histories of print culture, publishing, the book trade, and concepts of childhood. An interdisciplinary history, *Picturing Canada* provides a critical understanding of the changing geographical, historical, and cultural aspects of Canadian identity, as seen through the lens of children's publishing over two centuries. Gail Edwards and Judith Saltman illuminate the connection between children's publishing and Canadian nationalism, analyse the gendered history of children's librarianship, identify changes and continuities in narrative themes and artistic styles, and explore recent changes in the creation and consumption of children's illustrated books. Over 130 interviews with Canadian authors, illustrators, editors, librarians, booksellers, critics, and other contributors to Canadian children's book publishing, document the experiences of those who worked in the industry. An important and wholly original work, *Picturing Canada* is fundamental to our understanding of publishing history and the history of childhood itself in Canada.

From Peacekeeping to Peacemaking Routledge

This examination of Canada's response to the disintegration of the Federal State of Yugoslavia considers how Canadian foreign policy was formed, and the role of the prime minister in this decision-making. Gammer (political science, Okanagan University College) argues that Mulroney used his office to redefine international standards on humanitarian intervention. Gammer also outlines the risks in doing this, and considers the impact of Mulroney's stance on the behavior of Canadian troops. He considers the role of political leadership in foreign affairs, and its relationship to legitimacy. c. Book News Inc.

Public Hearings on International Child Labor Greenwood Publishing Group

The communications revolution and increased democratization and globalization have made every country more aware of its image and reputation - its "national brand." Whether a country needs to build international coalitions against terrorism, encourage cooperation to protect the environment, or attract investment and skilled labour, influencing foreign public opinion is now as crucial to national success as negotiating with foreign governments. Evan Potter analyses how the federal government has used the instruments of public diplomacy - cultural programs, international education, international broadcasting, trade, and investment promotion - to exercise Canada's soft power internationally. He argues that protecting and nurturing a distinct national identity are essential to Canada's sovereignty and prosperity, and suggests ways to achieve this through the strategic exercise of public diplomacy, at home and abroad. In offering the first comprehensive overview of the origins, development, and implementation of the country's public diplomacy, *Branding Canada* offers policy advice on Canada's approach and advances the thinking on public diplomacy in general.

A Question of Commitment McGill-Queen's Press - MQUP

In 1991, the Government of Canada ratified the United Nations Convention on the Rights of the Child, requiring governments at all levels to ensure that Canadian laws and practices safeguard the rights of children. *A Question of Commitment: Children's Rights in Canada* is the first book to assess the extent to which Canada has fulfilled this commitment. The editors, R. Brian Howe and Katherine Covell, contend that Canada has wavered in its commitment to the rights of children and is ambivalent in the political culture about the principle of children's rights. *A Question of Commitment* expands the scope of the editors' earlier book, *The Challenge of Children's Rights for Canada*, by including the voices of specialists in particular fields of children's rights and by incorporating recent developments.

History of Canadian Childhood and Youth Bahá'í-förlaget AB

This book is a history of Canada's role in the world as well as the impact of world events on Canada. Starting from the country's quasi-independence from Britain in 1867, its analysis moves through events in Canadian and global history to the present day. Looking at Canada's international relations from the perspective of elite actors and normal people alike, this study draws on original research and the latest work on Canadian international and transnational history to examine Canadians' involvement with a diverse mix of issues, from trade and aid, to war and peace, to human rights and migration. The book traces four inter-connected themes: independence and growing estrangement from Britain; the longstanding and ongoing tensions created by ever-closer relations with the United States; the huge movement of people from around the world into Canada; and the often overlooked but significant range of Canadian contacts with the non-Western world. With an emphasis on the reciprocal nature of Canada's involvement in world affairs, ultimately it is the first work to blend international and transnational approaches to the history of Canadian international relations.

The *Routledge Handbook of Youth Sport* is a comprehensive survey of the latest research into young people's involvement in sport. Drawing on a wide diversity of disciplines, including sociology, psychology, policy studies, coaching, physical education and physiology, the book examines the importance of sport during a key transitional period of our lives, from the later teenage years into the early twenties, and therefore helps us develop a better understanding of the social construction of young people's lives. The book covers youth sport in all its forms, from competitive game-contests and conventional sport to recreational activities, exercise and lifestyle sport, and at all levels, from elite competition to leisure time activities and school physical education. It explores youth sport across the world, in developing and developed countries, and touches on some of the most significant themes and issues in contemporary sport studies, including physical activity and health, lifelong participation, talent identification and development, and safeguarding and abuse. No other book brings together in one place such a breadth and depth of material on youth sport or the engagement of young people in physical activity. The *Routledge Handbook of Youth Sport* is therefore important reading for all advanced students, researchers, practitioners and policy-makers with an interest in youth sport, youth culture, sport studies or physical education.

Hearings and Reports: Investigation of un-American propaganda activities in the United States. Testimony of Walter S. Steele regarding Communist activities in the United States. Testimony of Victor A. Kravchenko. Hearings regarding Bloomsbury Publishing

This unique, pioneering study traces the origin, growth and basic features of the international law of youth rights. It consists of both source documents and commentary on the historical trends to elaborate and codify international instruments and standards in this field (especially by the League of Nations system: 1919--1940, and the United Nations system: 1946--1994), as well as action taken by governmental, intergovernmental, and non-governmental organizations to promote and protect youth rights. It concludes with a call for a new international instrument and monitoring machinery to better promote and protect the rights of youth on a global basis. For ease of reference, the book contains a comprehensive bibliography and indexes of instruments, ratifications, correspondents, subjects and countries.
