“A peek inside the homes
of tastemakers . . . A
masterclass in how to
infuse the ideas and finds
you scoop up on the road
into your digs back

home.” —Chairish A road
map for bringing far-flung
design ideas back home,
Travel Home shows us
how to curate interiors
that reflect our favorite
places and experiences in
ways that are beautiful
and authentic. Touring the
homes of leaders in global
design who share a deep
affection for travel, the
book explores interiors
with influences as

widespread as Marrakesh,
Paris, Cuba, Tokyo,
Portugal, and beyond.
Vivid photography is
supplemented with
insightful essays,
interviews, and
hardworking tips for
cultivating your own
global home. For
globetrotters and
armchair travelers alike,
Travel Home showcases
the interplay between

travel and design, revealing how we can take inspiration from the beauty we experience in the world and bring it into our everyday lives. “The book is a study of how travel informs our taste—and a beautiful illustration of the creative potential a mother-daughter partnership can yield.” —goop “Upon finishing *Travel Home* I felt inspired in the same way that I feel inspired after a big trip. It’s a book you’re going to want to take notes in, take pictures of, and share

with your friends. It will be a book very well loved.” —Justina Blakeney, designer and New York Times bestselling author of *Jungalow* “There are so many books about interiors, but this book is a genuine opportunity to get to know the people and the mentality behind their spaces.” —Nate Berkus and Jeremiah Brent, authors and television stars on *Nate & Jeremiah by Design* *Biomimicry* Timber Press Be inspired by Marjolein Bastin's passion for the natural world in this lovely

coloring book. “I see every day as a new gift full of new discoveries, which I want to share with everyone through my artwork.” --Marjolein Bastin Now you can share the beauty of Marjolein Bastin's nature-inspired art by coloring images based on her artwork. *Nature Design* Abrams Learn to create dazzling tablescape inspired by nature's beauty with this essential guide to styling stunning tablescape for any occasion. Discover endless inspiration for stunning table settings.

Brimming with inspired table spreads and simple-to-follow tips for incorporating crowd-pleasing recipes and lovely details into every presentation, this gorgeous coffee table book makes it easy to host warm, memorable gatherings—whether you're putting together a cozy brunch, a themed cocktail hour, or a festive holiday party. Photographs of exquisite table settings are paired with helpful styling tips—including how to pick your theme and color

palette, select the right tableware, and incorporate nature's bounty—plus simple-to-follow food and drink recipes that guarantee the spreads taste as good as they look. Readers will discover a botanical-themed cocktail cart, an ethereal ocean-inspired setting, a harvest table celebrating autumnal colors, and so much more. **EXPERT AUTHOR:** Shellie Pomeroy is a celebrated designer and textile artist. Her work has been covered in *Martha Stewart Wedding*, *Vogue*, *The*

Knot, and *Style Me Pretty*, among others. She shares all her secrets to creating showstopping displays using tableware, flowers, candles, fabrics, and more. **GIFT WORTHY:** With cloth accents and brimming with hundreds of inspired photographs, this book makes a beautiful statement on any coffee table or bookshelf, and a lovely gift for new homeowners, newlyweds, nature lovers, and design enthusiasts. **Perfect for:** • People who love Joanna Gaines's Magnolia brand or

Educational Series

Incorporated

The first design book that translates elements of nature—including flora, water, and wood—into elements of decor for beautiful, lived-in, bohemian interiors, from acclaimed designer and tastemaker Erica Tanov. Inspired by nature's colors, textures, and

patterns, design icon Erica Tanov uses her passion for textiles to create beautiful, timeless interiors that connect us to the natural world. Now, in her first book, *Design by Nature*, Tanov teaches you how to train your eye to the beauty of the natural world, and then bring the outdoors in—incorporating patterns and motifs from nature, as well as actual organic elements, into simple ideas for everyday decorating and design. *Design by Nature* contains new and imaginative

decorating ideas for an organic and bohemian style that mixes and layers rugs, pillows, throws, and drapery, and incorporates unique patterns and fabrics such as shibori, ikat, and jamdani, all stunningly photographed by renowned photographer Ngoc Minh Ngo. With topics ranging from embracing imperfection in your home, to seeking out flea markets, to displaying your collections, *Design by Nature* takes an enduring and intuitive approach to design that

transcends fleeting trends and encourages you to find your own personal style, source of creativity, and connection to the natural world. You don't need to travel to distant locales to find beauty; it's all around us, from the crackle of fallen leaves to the jagged bark of a tree.

Natural Tables Random House

"The whole world is a treasure waiting to be found. Open your eyes and see the wonderful things all around. This is the story of a child and a grandfather whose walk

around the neighborhood leads to a day of shared wonder as they discover all sorts of tiny, perfect things together. With rhythmic storytelling and detailed and intricate illustrations, this is a book about how childlike curiosity can transform ordinary days into extraordinary adventures.

[€] A modern classic nursery picture book featuring strong visual storytelling [€] Perfect bedtime or anytime reading for ages 2"€"7 [€] A relational book of observation and gratitude

which encourages children to find and appreciate what the world around them has to offer [€] Gifting occasions: baby gift, kid's birthday, just because"

Down to Earth Springer Science & Business Media
Drawing from the beauty of the natural world, award-winning jewelry designer Melissa Shippee has fashioned a breathtaking collection of wearable art. From delicate earrings made of graceful beaded flowers to a showstopping crystal fringe necklace inspired

by ancient stalactites, these 16 projects use popular materials such as seed beads and crystals. A basics section provides a refresher on essential beadweaving techniques.

Wild Buildings and Bridges Ryland Peters & Small

We seek inspiration in nature. The giver of life, it displays complex lines interwoven with each other, comfortable colour palettes, or atmospheres that set distinct moods. Illustration, on the other hand, is a timeless and layered artform that

never fails to be striking and full of character. When nature meets illustration, a powerful dynamic is created. Flora & Fauna explores how nature-themed illustration is incorporated into branding and identities. Featuring project types such as branding, packaging, print ads, art pieces and stationary design, groovy plants dominate a diverse mix of illustration-based work made with special production techniques and discrete styles. *Inspired by Nature*

Sketchbook Kids Can Press Ltd
A lovely nature-inspired art and journaling book featuring the distinctive artwork, projects, journal pages, and unique techniques of artist Tracie Lyn Huskamp. Along with hints and tips for photographing nature, collecting, and preserving natural elements, the book discusses ways to capture moments and create memories through simple sketches from photographs, painting on fabric, creating journals and journal art, as well as

with shadowbox assemblages to display and highlight particular found objects. The artist will share handwritten notes, drawings, poetry, and detailed techniques. *Biologically-Inspired Computing for the Arts: Scientific Data through Graphics* Compendium Publishing & Communications
Unlike most natural colours that are based on pigment absorption, the striking iridescent and intense colouration of many butterflies, birds or beetles stems from the

interaction of light with periodic sub-micrometer surface or volume patterns, so called “photonic structures”. These “structural colours” are increasingly well understood, but they are difficult to create artificially and exploit technologically. In this thesis the field of natural structural colours and biomimetic photonic structures is covered in a wide scope, ranging from plant photonics to theoretical optics. It demonstrates diffractive elements on the petal

surfaces of many flowering plant species; these form the basis for the study of the role of structural colours in pollinator attraction. Self-assembly techniques, combined with scale able nanofabrication methods, were used to create complex artificial photonic structures inspired by those found in nature. In particular, the colour effect of a Papilio butterfly was mimicked and, by variation of its design motive, enhanced. All photonic effects described here are underpinned by

state-of-the-art model calculations.

Design by Nature Ryland Peters & Small

In Hans Blomquist's new book *Inspired by Nature*, the stylist and art director identifies the connection between our home environment and our emotional wellbeing.

[She Explores](#) Clearview Home for the Soul is about creating a considerate and sustainable home that sparks happiness and reflects the spirits, passions and tastes of its inhabitants.

[The Crafted Garden](#)

Kalmbach Books

The designer and author of *Habitat* “shares how she imbues any space with warmth and energy” in this elevated yet accessible follow-up ([MarthaStewart.com](#)).

Down to Earth picks up right where *Lauren Liess's* critically acclaimed *Habitat* left off. While *Habitat* walked readers through the decorating process step-by-step, *Liess's* latest title takes a step beyond the basics and invites readers to incorporate the main

components of her familiar design aesthetic: nature, easy living, and approachability. With evocative photos and substantive design advice, *Down to Earth* focuses on creating a lifestyle that inspires creativity and functionality. Throughout the book, *Liess* shows readers how to incorporate six guiding principles in six unique homes: a new farmhouse, a classic American historical home, a lakeside contemporary house, a modern villa, a

turn-of-the-century American Foursquare, and a cedar and glass house on a bluff. While each home has a different architectural style, fingerprints of Liess's down-to-earth style are evident throughout. "Full of the stunning images you would expect. They will spark your creativity and inspire your own designs. However, the real beauty comes from Lauren showing readers how to create ease in their own homes."
—Ariadne Shoppe "Her style embraces lived-in,

vintage-inspired interiors . . . Her philosophy is that if your home is relaxed, then you're relaxed."
—One Kings Lane
Spaces Inspired by Nature
Frances Lincoln
Repackaged with a new afterword, this "valuable and entertaining" (New York Times Book Review) book explores how scientists are adapting nature's best ideas to solve tough 21st century problems. Biomimicry is rapidly transforming life on earth. Biomimics study nature's most successful ideas over the past 3.5

million years, and adapt them for human use. The results are revolutionizing how materials are invented and how we compute, heal ourselves, repair the environment, and feed the world. Janine Benyus takes readers into the lab and in the field with maverick thinkers as they: discover miracle drugs by watching what chimps eat when they're sick; learn how to create by watching spiders weave fibers; harness energy by examining how a leaf converts sunlight into fuel in trillionths of a

second; and many more examples. Composed of stories of vision and invention, personalities and pipe dreams, Biomimicry is must reading for anyone interested in the shape of our future.

Posh Adult Coloring Book: Inspired by Nature Rock Point

Nature Art Workshop is a visual resource for any artist or crafter desiring to combine their artistic talents with their love of the natural world. Each page engages, inspires, and encourages artists to

see the world around them in a new light while they learn to create their own nature-inspired art. Four talented visual nature artists guide readers through finding and prepping traditional media and natural elements to use in creating fun and unique nature-inspired projects following simple step-by-step instructions. Projects include a pressed-flower ceramic dish, fresh floral crown, and flower-adorned candles, in addition to painted feathers, stones, shells,

leaves, and more. Valuable art tips and techniques offer guidance during the artistic process. A fun, refreshing approach to mixed-media art, Nature Art Workshop proves that you can turn anything into a stunning work of art with the right materials and a bit of imagination.

The Natural Home Chronicle Books

The Natural Home is a place where natural materials and motifs are the key elements of a decorating style that is a joy to live with and a joy

to behold. Influential art director and stylist Hans Blomquist starts off by exploring the essence of his style. Firstly, *Plants and Flowers* celebrates the beauty of nature, botanical prints and pictures, and the cycles of the natural world. *Display* reveals Hans' passion for creating vignettes that showcase treasured pieces, while *Color* presents his favourite earthy palette, which provides the perfect muted backdrop for hits of brighter natural hues. In *Texture*, he revels in the

textures and patinas of natural materials – scuffed wood, frayed rope, beaten metal and bare stone. Finally, Hans shows how to use Fabrics to bring warmth and softness to any interior. In the second part of the book, *The Natural Homes*, through a series of case studies, Hans explores houses and apartments that showcase the beautiful simplicity and elegance of the natural look.

Biomimetics Walter Foster Publishing
This lavishly photo-filled

volume demonstrates that having an aquarium to be proud of means much more than keeping fish in a glass tank. The aquarium enthusiast who takes his hobby seriously reproduces a part of the aquatic natural environment in miniature inside his home. Author Peter Hiscock offers practical instructions on setting up a freshwater tropical aquarium. He describes substrate, aquarium plants, and appropriate combinations of fish. Much of this book focuses on fish and plant

life in nature, and then offers details on replicating natural settings in the aquarium. Both plants and fish varieties are shown in vivid color photos and described in detail. More than 450 color photos and illustrations.

In the Mood for Colour Ten Speed Press

“If you cut down the goldenrod, the wild black cherry, the milkweed and other natives, you eliminate the larvae, and starve the birds. This simple revelation about the food web—and it is an

intricate web, not a chain—is the driving force in *Bringing Nature Home*.” —The New York Times As development and subsequent habitat destruction accelerate, there are increasing pressures on wildlife populations. But there is an important and simple step toward reversing this alarming trend: Everyone with access to a patch of earth can make a significant contribution toward sustaining biodiversity. There is an unbreakable link between native plant species and

native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals. In many parts of the world, habitat destruction has been so extensive that local wildlife is in crisis and may be headed toward extinction. *Bringing Nature Home* has sparked a national conversation about the link between healthy local ecosystems and human well-being, and the new paperback

edition—with an expanded resource section and updated photos—will help broaden the movement. By acting on Douglas Tallamy's practical recommendations, everyone can make a difference.

Photonic Structures Inspired by Nature IGI Global

Provides a professional, contemporary, and concise review of the current knowledge and advances in biomimetics. This book covers the field of biomimicry, an area of

science where researchers look to mimic aspects of plants or animals in order to solve problems in aerospace, shipping, building, electronics, and optics, among others. It presents the latest developments in biomimicry and gives readers sufficient grounding to help them understand the current, and sometimes technically complex, research literature. Different themes are covered throughout and text boxes deal with the relevant physics for

readers who may lack this knowledge. *Biomimetics: Nature-Inspired Design and Innovation* examines issues in fluid dynamics such as avoiding sonic booms, reducing train noise, increasing wind turbine efficiency, and more. Next, it looks at optical applications, e.g. how nature generates color without dyes and pigment, and how animals stay cool in desert environments. A chapter on the built environment discusses cooling systems for buildings based on termite mounds; creating

self-cleaning paint based on lotus leaves; unobtrusive solar panels based on ivy; and buildings that respond to the environment. Two more sections focus on biomimicry for the creation of smart materials and smart devices. The book finishes with a look at the field's future over the next decade. Presents each topic in sufficient detail in order to enable the reader to comprehend the original scientific papers. Emphasizes those examples of biomimicry

that have made it into products. Features text boxes that provide information on the relevant physics or engineering principles for biologists who do not have a physics background. Covers the scientific literature up to July 2019. *Biomimetics: Nature-Inspired Design and Innovation* is an excellent book for senior undergraduates and post-graduate students in the life sciences, material sciences, and bioengineering. It will also appeal to lay readers with

an interest in nature as well as scientists in general.

Tiny, Perfect Things

Abrams

Be inspired by Marjolein Bastin's passion for the natural world in this unique, inspirational sketchbook. The artist keeps detailed sketchbooks of the things she encounters in nature, combining both art and words. She draws inspiration from these sketchbooks to create her fully wrought, exquisitely detailed pieces of art. This book features sketches

selected by Marjolein, with facing pages showing her finished art that was inspired by the sketches. Blank pages are included after each beautiful spread for the user's own drawings and thoughts. With a durable cover, an envelope in the back for nature finds, and a bound ribbon bookmark, this sketchbook is both beautiful and useful. *Nature Inspired Ten* Speed Press
Can we design organizations in a way that creates a space where employees, the

organization, and the larger community all thrive? And if so, where can we go for inspiration to help us achieve this goal? In a time of volatile and complex uncertainty, it is time to learn the lessons that nature has compiled from 3.8 billion years of research and development. Nature is an interdependent, dynamic and living system – just like today's organizations and communities. Kathleen Allen uses nature as a model, mentor, and muse to rethink how leadership is

practiced today. Leading from the Roots takes nature as a source of inspiration to help organizations see a new way of leading and designing workplace structure, applying the generous framework found in mature ecologies to human organizations. Kathleen Allen helps shift assumptions, practices, structures, and processes of organizations to become more resilient and nourishing for all, and, along the way, design the way out of workplace dysfunction

and drama. "Leading from the Roots provides a powerful new way of thinking about organizations as living systems and delivers practical leadership frameworks for individuals to learn how to unleash

the energy and create innovative, effective teams. -Anne Boneparte, CEO Appthority This book is a must read for organizational leaders who are not only committed to their

mission, but equally to creating a workplace that attracts and retains the brightest and the best professionals fully enabled to meet that mission. -Caryl Stern, President & CEO UNICEF USA
