ELLE MATHIAS

Torpedo War and Submarine Explosions Sourcebooks, Inc.

Now in its second edition *Maritime Economics* provides a valuable introduction to the organisation and workings of the global shipping industry. The author outlines the economic theory as well as many of the operational practicalities involved. Extensively revised for the new edition, the book has many clear illustrations and tables. Topics covered include: * an overview of international trade * Maritime Law * economic organisation and principles * financing ships and shipping companies * market research and forecasting.

Tall Ships Today Hachette Books

The Second World War stands for the criminal madness of German Nazi government. Less known is their responsibility for the only climatic shift from warm to cold in an otherwise constantly warming world over the last 150 years. Not knowing the reason for the biggest climatic shift since

industrialization, which started in winter 1939/40, rectifies to speak about failures of meteorology. Only four months into Second World War Northern Europe experienced the coldest winter in 100 years. The reason: plain physics! Naval war in Northern European seas released the summer heat too quickly. Polar air got free access to Europe. The same applies to the second and third war winter. Europe was back in the Little Ice Age. After Japan attacked Pearl Harbor on Dec. 7th, 1941 naval war became a global affair. In close conformity with naval war in European seas, and subsequently in the Pacific, a pronounced global cooling took place, which lasted until about the mid 1970s. Furthermore, a thorough research of strong warming in the Northern Hemisphere from winter 1918/19 to winter 1939/40 would have revealed a convincing link to naval war in Europe from 1914 to 1918. But climatology does not care! The connection between two naval wars and two climatic changes within 25 years has not yet been investigated and explained. If they had warned governments about the threat of climate change, as their successors currently do with the "greenhouse effect", naval activities in two World Wars may have been prevented, or at least been limited. Claims to understand climate should be regarded as a failure as long as meteorology is

unable to explain the two most pronounced climatic shifts during the last century and the role two world wars had in this game. These two events would show that the oceans have a dominate role in the climate system, and man is able to change its direction by intensive activities in the marine environment. It took four months to generate the extreme regional winter 19

The currents of History run deep and often unseen beneath the everyday ripple of events. But now and again the current rises to the surface, and the events of a single day shed an exceptional light on the meaning of the past. Such events are the subject of Days that Changed the World. Some of the 50 days described here mark the end of an era; others the start of something new. Many are the dates of bloody battles or murders; others of momentous decisions or breathtaking discoveries. All are remembered as powerful symbols of their time. Our story begins almost 2500 years ago on 28 September 480 before the Christian Era, when the Athenian navy destroyed the Persian invasion fleet in the Bay of Salamis. Had the Persians won we might never have heard the names of Plato, Aristotle or Alexander, nor recognize the word democracy. Charting 50 such defining moments, concluding with 11 September 2001 and the destruction of New York's Twin Towers, Days that Changed the World is a unique and fascinating way to portray the story of world history. These 50 history-making days include: The Battle of the Salamis; The Assassination of Julius Caesar; The Crucifixion of Jesus Christ; The Dedication of Constantinople; The Death of Muhammad; The Coronation of Charlemagne; The Death of Genghis Khan; The Fall of Constantinople; The Defeat of the Spanish Armada; The Defenestration of Prague; The Fall of the Bastille; The Battle of Waterloo; Parliament Passing the Emancipation Act; The Battle of Sedan; The Boxer Rebellion; The First Day of the Somme; The Japanese Attack on Pearl Harbor; The Bombing of Hiroshima; Martin Luther King's "I have a Dream"; The Breaching of the Berlin Wall; Nelson Mandela's Release from Prison; Nine Eleven.

The History of Fly-Fishing in Fifty Flies Fordham Univ Press

In the Highest Degree Tragic tells the heroic story of the U.S. Asiatic Fleet's sacrifice defending the Dutch East Indies from the Japanese in the first three months of the Pacific War. Donald M. Kehn Jr.'s comprehensive narrative history of the operations involving multiple ships and thousands of men dramatically depicts the chaotic nature of these battles. His research has uncovered evidence of communications failures, vessels sinking hundreds of miles from where they had been reported lost, and entire complements of men simply disappearing off the face of the earth. Kehn notes that much of the fleet went down with guns blazing and flag flying, highlighting, where many others have failed to do so, the political and strategic reasons for the fleet's deployment to the region in the first place. In the Highest Degree Tragic rectifies the historical record, showcasing how brave yet all-too-human sailors and officers carried out their harrowing tasks. Containing rare first-person accounts and anecdotes, from the highest command echelons down to the lowest enlisted personnel, Kehn's book is the most comprehensive and exhaustive study to date of this important part of American involvement in World War II.

The Sailor's Bookshelf Quercus

* The first full-length study of the Athenian politician Aeschines Though often overshadowed by his famous rival Demosthenes, Aeschines plays a major role in the decisive events that marked the rise of Macedonian power in Greece and thus marked the transition from the Classical to the Hellenistic period.

Fifty Animals That Changed the Course of History Magic Dome Books

Admiral Stavridis, a leader in military, international affairs, and national security circles, shares his love of the sea and some of the sources of that affection. The Sailor's Bookshelf offers synopses of fifty books that illustrate the history, importance, lore, and lifestyle of the oceans and of those who "go down to the sea in ships." Stavridis colors those descriptions with glimpses of his own service—"sea stories" in popular parlance—that not only clarify his choices but show why he is held in such high esteem among his fellow sailors. Divided into four main categories—The Oceans, Explorers, Sailors in Fiction, and Sailors in Non-Fiction—Admiral Stavridis' choices will appeal to "old salts" and to those who have never known the sights of the ever-changing seascape nor breathed the tonic of an ocean breeze. The result is a navigational aid that guides readers through the realm of sea literature, covering a spectrum of topics that range from science to aesthetics, from history to modernity, from solo sailing to great battles. Among these eclectic choices are guides to shiphandling and navigation, classic fiction that pits man against the sea, ecological and strategic challenges, celebrations of great achievements and the lessons that come with failure, economic competition and its stepbrother combat, explorations of the deep, and poetry that beats with the pulse of the wave. Some of the included titles are familiar to many, while others, are likely less well-known but are welcome additions to this encompassing collection. Admiral Stavridis has chosen some books that are relatively recent, and he recommends other works which have been around much longer and deserve recognition.

Failures of Meteorology! Unable to Prevent Climate Change and World Wars? Naval Institute Press

In the world of fashion trends come and go, but the work of a small number of designers has survived to stand the test of time. From pioneers such as Coco Chanel and Christian Dior to the era-defining figures of Alexander McQueen and Paul Smith, explore the stories and examine the work of the 50 most ingenious and influential designers in fashion history. Contents include: Coco Chanel Yves Saint Laurent Issey Miyake Jean-Paul Gaultier Vivienne Westwood Pierre Cardin Miuccia Prada Karl Lagerfeld Calvin Klein Tom Ford Giorgia Armani Phoebe Philo Christopher Kane ...and many more.

Tales of the clipper ships Sourcebooks, Inc.

How do you make your way in a fast-changing world? Why do we have less and less time? Why are some people unfaithful? Who governs the world? This book is about change - from the small and seemingly insignificant transitions in our day-to-day lives, to the big and almost incomprehensible shifts in human history. Because if we want to make change happen ourselves, we have to understand it first. Distilling expert wisdom and complex theories, the authors of the bestselling The Decision Book present fifty simple and effective models to help us make sense of our changing world. Everything is in a constant state of change, from the personal and political to economics and the environment. Whether you're buying a new car, deciding who to vote for, or making an investment, this little book offers surprisingly simple explanations of the biggest theories of transformation that will help you see the world anew - and radically challenge some of your preconceived ideas.

The History of Fly-Fishing in Fifty Flies recounts the history of a sport that dates back 2,000 years, focusing on milestone flies from the first feathered hook to contemporary patterns using cutting-edge materials. Among the countless fly patterns created over the centuries, these 50 have been carefully chosen to represent the development not only of the flies themselves, but also of fly-fishing techniques—and of rods, lines, and reels. These iconic flies also chart the spread of this addictive sport from its modern origins on the chalk streams of southern England and the rivers of Scotland to the U.S., Europe, South America, Australia, and now to every country in the world. Filled with profiles of the key characters involved, tying tips, photographs and illustrations of the flies, and detailed explanations of the techniques used to fish them, The History of Fly-Fishing in Fifty Flies is a fascinating companion to the evolution of this fascinating sport.

Tales of Buccaneers: 50+ Sea Adventure Novels Picador USA

The #1 New York Times bestseller—a thrilling and seductive Cinderella love story from E L James, author of the phenomenal bestselling Fifty Shades Trilogy. Clasp her plait at the base of her neck, I tug lightly, bringing her lips up to mine. "Alessia," I breathe, and kiss her again, softly, slowly. She stills in my arms, then brings her hands up to clutch my biceps, closing her eyes as she accepts me. I deepen the kiss, my tongue teasing her lips, and she opens her mouth. She tastes of warmth and grace and sweet seduction. London, present day. Life has always been easy for Maxim Trevelyan, the "spare" to the earldom of Trevethick. With his good looks, aristocratic connections, and money, he's never had to work, and he's rarely slept alone. But all that changes when tragedy strikes and Maxim inherits his family's title, wealth, and estates, and the responsibility that entails. It's a role he's not prepared for and one he struggles to face. But his biggest challenge is fighting his desire for an unexpected, enigmatic young woman who's recently joined his staff. Retentive, beautiful, and musically gifted, she's an alluring mystery, possessing little more than a dangerous and troublesome past. As Maxim's longing for her deepens into a passion he's never experienced and dares not name, he's left to wonder just who is Alessia Demachi? And can he protect her from the malevolence that threatens her? From the heart of London through wild, rural Cornwall to the bleak, forbidding beauty of the Albanian Balkans, The Mister combines the sensuality of a modern Regency romance with the danger, desire, and adventure of E L James's captivating storytelling, leaving the reader breathless to the very last page.
