'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought Perfumes: The Guide by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, Guardian Perfumes: The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

This volume investigates the application of psychological theory to the case of terrorism and political violence. This book offers a framework for approaching psychological research on terrorism that encourages an explicit orientation to the issues that have acted as road blocks to the potential for psychology as a discipline to meaningfully contribute to terrorism research. The framework encourages researchers to define the research parameters in clear concise terms, devoid of theoretical jargon and rooted in an understanding of real world social problems. Furthermore, researchers are encouraged to be explicit about the vantage point through which the problem is being viewed (i.e., is it a problem for participants themselves? For broader society, for policy-makers and other stakeholders?) and what the intended outcome of the research might be. Furthermore, this volume aims to demonstrate how to apply existing psychological theory to terrorist related phenomenon. In doing so, researchers are asked to consider whether the research problem is psychological in nature and if so, what existing theories can help explain, if not alleviate the problem. As such, researchers in psychology are encouraged to dig deep, to tap into the wealth of knowledge available in psychology to understand terrorist related phenomenon as embedded within normal psychological processes, albeit manifesting in what can be considered exceptional situations and circumstances. Applying Psychology: The Case of Terrorism and Political Violence will appeal to academics, students, and professionals interested in applied psychology, terrorism studies, sociology, international security, and international relations.

Ireland, 279 BC. A nation at war. For two boys, it will be gruelling. For Ireland... it will be bloody.

When the first raiding skirmishes of a foreign army are crushed and Ireland mourns her dead, one king knows their newfound peace is destined to fail. As Overking of Ailigh, Keeper of the North, he calls for the boys of his Celtic tribes to train as formidable warriors under his command. For Áed, it begins as a fantastical quest. For Rónán, it helps him escape a cruel chieftain. Together, they must train and grow in strength and might. And when the invading army returns, a nation goes to war, united under one banner. Meanwhile, Áed's sister begins her training as a druid, learning the spiritual ways of the earth. And when the goddess Cáer speaks to her in her dreams, she knows that Ireland's future hangs in the balance. With Áed skilled in close combat, and Rónán blessed with an archer's eye, they fight side by side, champions of the Celts. But death is close. And the tides of war are forever in flux. The Irish Celts know one thing: if the warmongering foreigners aren't defeated, not even the druids can change the course of destiny.

Since the process of Southern Europe's integration in the European Union, the Mediterranean region has seen a more considerable gap between central and northern European countries and its Southern European counterpart. Thus, in a European context of social cohesion, it becomes necessary to better understand Southern Europe, without escaping to the common perception of the complexity of Mediterranean culture. As a significant player throughout history, Southern Europe consistently established a platform of diversity and freedom, bringing peace between different historic-cultural traditions. Moreover, the southern frontier of Europe to Africa and Asia has become a crucial determinant in the current times of change.

Blockchain is no longer just about bitcoin or cryptocurrencies in general. Instead, it can be seen as a disruptive, revolutionary technology which will have major impacts on multiple aspects of our lives. The revolutionary power of such technology compares with the revolution sparked by the World Wide Web and the Internet in general. Just as the Internet is a means of sharing information, so blockchain technologies can be seen as a way to introduce the next level: sharing value. Blockchain and Web 3.0 fills the gap in our understanding of blockchain technologies by hosting a discussion of the new technologies in a variety of disciplinary settings. Indeed, this volume explains how such technologies are disruptive and comparatively examines the social, economic, technological and legal consequences of these disruptions. Such a comparative perspective has previously been underemphasized in the debate about blockchain, which has subsequently led to weaknesses in our understanding of decentralized technologies. Underlining the risks and opportunities offered by the advent of blockchain technologies and the rise of Web 3.0, Blockchain and Web 3.0 will appeal to researchers and academics interested in fields such as sociology and social policy, cyberculture, new media and privacy and data protection.

This book examines desistance from offending amongst men in County Cork – the largest county in the Republic of Ireland. It examines the bigger picture of desistance, namely how offending and recovery from addiction are inseparable processes. It draws on in-depth interviews with 40 men who had engaged with the criminal justice system, and the chapters which follow trace the participants' life histories: from the hardships they endured as children through their recollection of their reckless teenage years into active addiction and their often numerous attempts at recovery and eventually, for most, full recovery. It challenges some of the dominant assumptions that exist around desistance, and discusses topics such as toxic masculinity. It offers a practice friendly account of the academic work on desistance and a multidisciplinary holistic account of the process of doing desistance.

Erin's Diary: An Official Derry Girls Book Trapeze

This volume focuses on the tree, as a cultural and biological form, and examines the concept of folk value and its implications for biocultural conservation. Folk value refers to the value of the more-than-human living world to cultural cohesion and survival, as opposed to individual well-being. This field of value, comprising cosmological, aesthetic, eco-erotic, sentimental, mnemonic value and much more, serves as powerful motivation for the local performance of environmental care. The motivation to maintain and conserve ecology for the purpose of cultural survival will be the central focus of this book, as the conditions of the Anthropocene urgently require the identification, understanding and support of enduring, self-perpetuating biocultural associations. The geographical scope is broad with chapters discussing different tree species from the Americas and the Caribbean, East Asia, Eurasia and Australia and Africa. By focusing on the tree, one of the most reliably cross-culturally-valued and cross-culturally-recognized biological forms, and one which invariably defines expansive landscapes, this work illuminates how folk value binds the survival of more-than-human life forms with the survival of specific peoples in the era of biocultural loss, the Anthropocene. As such, this collection of cross-cultural cases of tree folk value represents a low hanging fruit for the larger project of exploring the power of cultural value of the more-than-human living world. This book will be of great interest to students and scholars of conservation, biodiversity, biocultural studies and environmental anthropology.
